SimAngus™

- Ammunition is a maternal brother to EGL Firesteel.
- Definitely a bull to use on heifers, calves weighing 65–70 lbs. They come easy with lots of vigor.
- Great disposition. Great hair. The heifers all carry the look and easy keeping desired for replacements.
- Top 2% CE & Top 5% MCE.

Dam – TJ 22X

SimAngus™

- Deadwood is a beef bull. He is a deep-bodied, wide-topped, and deep-quartered as any bull walking. This bull just offers more.
- Deadwood is the bull the industry is looking for. His EPD profile predicts top weaning, yearling, and maternal values along with elite marbling, grid, \$API, and \$TI.
- Deadwood presents those highly valued traits and dollar values in a very powerful package. There are very few breeding options today that can rival Deadwood's power and body mass.
- Deadwood offers excellent outcross mating options. His pedigree is one that is not related to many breeding programs. If you need to add some easy-fleshing, easy-keeping genes, Deadwood will deliver.
- Deadwood's own performance is exceptional, actual BW 81 lbs., 205 wt 818 lbs., and 365 wt 1,453. This bull's performance along with his top 5% marbling is lined up to be right on target to meet the new grading system that is pushing for extra carcass wts, and still has the ability to marble well.

Semen: \$35/unit

Semen available through owner.
